PREFACE.

In this Catalogue we place before numismatists an array of coins of so many nationalities that no one can view the collection without finding many pieces long sought for; particularly the coins of Japan and India, most of which are new to America, and with their descriptions represent years of research on the part of Mr. Noel Gray, now of Yokohama. Among his American coins are some of exceeding rarity, among which may be mentioned 1858 dollar, 1796 half-dollar, and half-cent of same date; also rare varieties of commoner issues; 1823 quarter-dollar; 1822 dime, the *finest known*, being perfectly uncirculated, in this condition the most valuable of the series; 1838 half-dime, no stars; Castorland 1796 half-dollar, *original*; American Congress piece, of which but two others are known; and numerous rare coins. Jackson tokens, Centennial medals, etc.: the silver idols of Peru are of a peculiar style of workmanship so well known to experts in like antiquities, and we believe this is the first opportunity offered collectors to obtain choice mementos of the race of Incas, who inhabited America before the advent of the "Christianizing" Spaniards. The series of Napoleon medals is remarkably full of interesting and historical pieces issued by this modern Cæsar.

We may also mention the collection of paper money used by our forefathers before and since their struggle for independence. Although successful in their attempt to secure freedom, they were not equally successful in redeeming their paper money, which now sells at low prices, regardless of denomination.

Many collectors who have not had experience in purchasing at auction sales on account of living at too great distance from New York, may have their orders executed by the auctioneers; Messrs. Scott & Co., or other dealers, for a commission of ten per cent. on amounts under \$100—over \$100 5 per cent.—a uniform charge of 50 cents made on any amount under \$5.

In reference to the method of selling at auction, we would say that each lot is sold to the highest bidder, at so much for each coin in the lot (except in cases of proof sets), so if you desire a lot of coins which contains 10 pieces and you wish to pay \$1.00 for it, you should bid 10 cents each. Always state your highest price, relying on the honor of those you employ to make the purchases for you at the lowest possible figure.

SILVER COINS OF JAPAN.

This is the finest collection of Japanese coins offered in this country; it contains many pieces never before seen by our modern amateurs, and, as we are informed by Mr. Noel Gray, they are almost unattainable in Japan. As there are so many of this class of coins we

will say nothing of rarity, but allow the coins to testify for themselves. It is quite possible some of them will sell very low, owing to the difficulty of properly describing the designs.

- 150 328 Earliest coinage; 1 Bou very rude lump; about 200 B. C.; curious square characters; very good; thick oval.
- 150 329 ——— 2 Bous; similar to last; fine.

A REVISED LIST

OF ALL

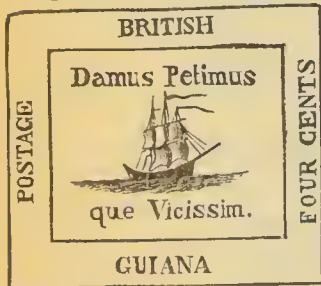

Postage Stamps and Stamped Envelopes

This is the only work of the kind ever published in America, and in the short space of two months has become the standard of all English-speaking stamp collectors. It contains an accurate list of every postage stamp ever issued, minutely describing every variety of color, water mark and paper, together with all the minor details concerning the different dies of the same stamp. It is fully illustrated with about fifteen hundred engravings, and besides being the latest is the most accurate work of the kind ever printed. Numerous notes explain every doubtful point in Philately, and give many interesting details concerning the causes which led to the issue or suppression of noted stamps. Mr. Coster's valuable monograph on the United States locals is added entire, forming a work which no collector who has outgrown the boy period of pasting stamps in a copy book can afford to be without. It is not a price list or a dealer's advertisement in any sense of the word.

Large 8vo, 400 pages, - - Cloth, \$2.50.

SCOTT & COMPANY, 146 FULTON STREET,
AND ALL BOOKSELLERS.

Specimen paragraph :

1856

Ship sailing to right in center, DAMUS PELIMUS above, QUE VICISSIM below, in outer lined frame inscribed, BRITISH above, GUIANA below, POSTAGE on left, FOUR CENTS on right side. Black imp., large obl.

4 cents, magenta, dark blue.

NOTE.—These stamps were type set in the colony, for use temporarily, each one being authenticated by the postmaster's initials, and as a further precaution were not sold to the public, but affixed to the letters by the post-office clerks. They are among the rarest stamps known.

CRITIQUES.

"The work is profusely illustrated, and forms a valuable book of reference for postage stamp collectors."—*The N. Y. Daily Graphic*, June 26.

"Will be highly appreciated by philatelists the world over. It is the first complete catalogue of all stamps ever issued that has been made for collectors, and if it were a catalogue only, it would be of great value, but it is much more. The 400 broad pages contain the full history of every issue of every government, and a full description of every stamp, both government and private. Fifteen hundred engravings illustrate the text, and a complete index makes the information readily accessible."—*The N. Y. World*, June 21.

"The book is decidedly remarkable for the industry and patience displayed in the compilation of facts concerning postage stamps and stamped envelopes all over the world. To those who have paid no special attention to this curious study this catalogue will be a revelation, for though there are over one thousand five hundred fac-similes of stamps scattered over the 410 pages contained between its covers, they form only a tithe of the whole, for the catalogue describes several thousand varieties. Turning over the leaves of Mr. Scott's catalogue we are compelled to admire the system he has adopted, while realizing the time and study he must have devoted to his subject. The result is a manual that must be a great help to old collectors and indispensable to beginners. Clearly printed in large type and handsomely bound, the book will undoubtedly become a standard work of reference."—*N. Y. Herald*, June 30th, 1879.
